iPad App Installation Guide

The Ewing Public Schools will be doing nightly staged rollouts of iPad app installs beginning at 4pm.

Here is an instruction guide to ensure the proper installation of the app and minimize failed installs:

1. **Please make sure the iPad charging cable is plugged into the iPad**

2. **Ensure the iPad charging brick is plugged into a known working outlet and that the other end of the charging cable is plugged into the charging brick**

3. **Make certain that a Wi-Fi connection has been established with the device through the settings app**
   a. **The settings app can be found in the 2nd page of apps in a folder labeled "Apple"**

4. **When the app is pushed to the iPad device, you will see a loading icon on the iPad for each app that is being installed. During this process <u>DO NOT</u> turn off the device or disconnect from Wi-Fi. The least amount of interaction with the iPad device at this time is recommended**

5. **You will know the device has installed the app correctly once the loading symbol is no longer visible.**
