The mission of the Ewing School District is to provide a quality educational experience for each child in our diverse student population.

Students, family, faculty and community will create a partnership that promotes the academic, intellectual, creative, emotional, social, moral and physical growth of each student.

This partnership will develop life-long learners who are responsible, successful citizens making positive contributions to our global society.

Philosophy and Belief Statements

The Ewing Township Public School District is dedicated to meeting the educational needs of its students. We will identify and address the needs of each student to provide them the opportunity to reach their maximum potential.

Therefore, we believe the following:

1. That all students are expected to achieve a strong academic foundation and be appropriately challenged. It is the expectation of this school district that all pupils achieve the New Jersey Core Curriculum Content Standards at all grade levels.

2. That the school environment will encourage curiosity, creativity and a life-long love of learning.

3. That all students have the opportunity to succeed academically in school, as well as socially, emotionally and physically.

4. That the school, home, community and students are partners in learning.

5. That all students and their families must assume an appropriate level of responsibility for themselves and their actions.

6. That all students have the right to a safe and secure educational environment.
